Title: Green electricity faced with European stakes

Date & location: 15th February 2007, Lyon

Organiser: Rhônealpeénergie-Environnement

Number of Participants: around 60

Short description:

This one-day meeting took place during the Renewable Energy Exhibition organised in Lyon. The meeting gave an overview of the regional situation concerning green electricity, presented some best practices in other European countries, and tackled both administrative and technical issues linked to the development of green electricity in France.

Background:

Green electricity in Rhône-Alpes starts to develop but some types of energy are more represented than others. Big hydro plants represent the larger part of the regional green electricity production, whereas small hydro plants are somewhat blocked by administrative requirements. Photovoltaics are fostered by the French policy and develop quite fast in Rhône-Alpes, wind energy is only developed in the south of the region, and as regards biomass, there are very few running installations. Then, many efforts need to be done at the regional level.

Aim & programme:

The aim of the meeting was to analyse the situation in Rhône-Alpes, to have a better knowledge of the administrative difficulties for each type of energy, to discuss about the technical possible evolutions, to be aware of other countries' best practices and finally, to assess how the regional and national objectives as regards green electricity can be reached.

The meeting was opened by Jean-Louis Gagnaire, vice-chairman of the Regional Council, representative of the economic development, who presented the regional situation. Then four main aspects were discussed:

- regional situation and stakes
- the administrative context
- future prospects for technical solutions
- economical solutions

Results, follow-up:

The vice-chairman of the Regional council reminded the regional objectives which were defined in the "Regional plan for renewable energies and energy conservation" as well as the national policy concerning green electricity (new feed-in tariffs). It's clear that the

present policies now prove to be quite incentive as regards the development of green electricity.

Administrative difficulties were then discussed as regards small hydro and biogas. In the afternoon, technical evolutions were presented for photovoltaics and small wind energy plants in cities.

Best practices from other countries were presented all along the day for wind energy in Spain, wood cogeneration in Belgium and small hydro using drinking or waste water in Switzerland.

The meeting was closed by Roger Leron, chairman of Rhonalpénergie-Environnement, who mainly reminded the European objectives as regards green electricity and presented the declaration of the regions for Energy Efficiency and Renewable Energy Sources.

List of Participants:

M	BOUVIER	FREDERIC	ATMO RHONE ALPES	GRENOBLE	FRANCE	CONSULTANT
M	BOUZAT	BERNARD	EDC	VILLEFRANCHE DE PANAT	FRANCE	CONSULTANT
M	BRIET	J YVES	ID 2	VALENCE	FRANCE	CONSULTANT
MME	BROCHIER	BLANDINE	CLESTRA HAUSERMAN	VAULX EN VELIN	FRANCE	AUTRE
M	CASSUS SOULANIS	ALBAN	FRANCE HPV	VINCENNES	FRANCE	INGENIEUR
MME	DUVAL	AGNES	ADEME	LYON	FRANCE	INGENIEUR
M	HUGOO	ALEXANDRE	HUGOO ALEXANDRE	MEYLAN	FRANCE	CHOMEUR
M	IVELICS	RAMOND	BIOKOM	7632 PECE	HONGRIE	CHEF DE PROJET
M	PARDO	EMMANUEL		ORSAY	FRANCE	CONSULTANT
