

EVENT DESCRIPTION

Res-e Regions

Title: Boosting green electricity in 11 regions

Date & location: 24th Jan, Brussels

Organiser: Fedarene, O.Ö. ESV & Eref

Number of Participants: 44

Short description:

This event targeted organizations able to boost green electricity such as Regional and Local Energy Agencies or Councils, green electricity producers and planners and EU representatives.

Background:

At the end of 2005, the Member States report on the implementation of the RES-e Directive, and the 11 partner regions of the project report on the implementation of the RES-e Directive at the Regional Level (Grid access and administrative procedures, Regions' and municipalities' maps and analysis....) and identify the main barriers on the implementation of RES-e.

Aim & Programme:

The aim of this seminar was to provide complete information on the implementation of the RES-e Directive and on the new RES initiatives and to propose solutions for removing identified barriers. It was the right time to confront ideas between the RES-e players or regulators and to propose new initiatives.

- Introduction , *Christiane Egger, ESV*
- The implementation of the RES-e directive (present status, recent national reports, Commission report on Financing, possible next steps), *Beatriz Yordi Aguirre, European Commission*
- Short summary of the 11 transposition reports, *David Clubb, MWEA*
- Access to the Market – obstacles & solutions, *Dörte Fouquet & Peter Danielsson, EREF*
- Nuclear Renaissance and the subsidy issue, *Dörte Fouquet, EREF*
- Recent RES policy initiatives, *Marc Timmer, Eufores*

Results, follow up:

The feedback from the participants was very good. The main comments were on the quality of the overview on the support mechanisms for RES and on the richness of the discussions between Agencies and green electricity producers

The proceedings of the seminar are available on the web site:
