

## Event Description (WP3/Training)

**Title:** Trainingsseminar “Energie in Gemeinden“  
(Training “Energy in municipalities“)

**Date & Location:** 19 October 2006, Linz

**Organiser:** O.Oe. Energiesparverband

**Number of participants:** 30

### Short description:

The training “energy in municipalities” was organized by the O.Oe. Energiesparverband and took place on the 19 October 2006 in Linz. It informed interested representatives of all sectors of municipal administration about new developments in the use of renewable energy sources, especially renewable electricity.

### Background:

To support the municipalities’ efforts in the area of sustainable energy generation and use, a special RES-e support programme was launched in Upper Austria.

### Aim & programme:

Aim of the seminar was it to inform about current developments in the field of renewable energy sources and RES-e options in general and to provide a sound basis for decision-making concerning the realisation of energy projects of municipalities. The programme of the seminar was comprehensive and included presentations about the following topics:

- RES-e concepts and financing
- Energy management and accounting
- Energy saving measures and third party financing

Besides the main target of encouraging the use of RES-e in the public sector by providing technical and organisational background information and presenting successful examples of how measures in this area can be implemented, also the subjects lighting and electricity saving have been treated.

## Results, follow-up:

The event was an important impulse which motivated many decision-makers to realize energy-projects in their municipalities.
