

EVENT DESCRIPTION

RES-e Regions

Title: Bürgermeisterfrühstück "Energiespar-Gemeinden" (breakfast for mayors)

Date & location: 23 May 2006, Linz

Organiser: O.Ö. Energiesparverband

Number of Participants: 37

Short description:

The "breakfast for mayors" which was organised by the O.Ö. Energiesparverband on 23 May 2006 in Linz, informed municipalities about the possibilities of modern RES-e technologies, by developing local strategies.

Background:

In Upper Austria, the regional government has launched a new support programme for municipalities which helps them to develop and implement local energy strategies. The event aimed to inform and train mayors and other decision makers in municipalities about RES-e options.

Aim & programme:

The information event for mayors started with the presentation of the support programme by Mr. Dell, followed by the presentation of three best practice examples of local energy strategies in municipalities. Mr. Moser and Mr. Payr highlighted the municipality of Munderfing, Mr. Lehner the municipality of Katsdorf and Ms. Haslbauer the municipality of Laakirchen. At the end of the event, architect Mr. Poppe presented architectural solutions for sustainable energy.

Results, follow-up:

As several municipalities have already implemented energy efficient strategies also by using RES-e technologies, the event motivated other municipalities to copy these strategies. Other information events for mayors on different energy topics are planned.
