

EVENT DESCRIPTION

UL- FME

Title: Study tour to Upper Austria
Date & location: 30th – 31st of March 2006, Linz,
Upper Austria
Organiser: UL-FME, Slovenia
Number of Participants: 21

Short description:

Background

A study tour to Linz in Upper Austria was organised by University of Ljubljana – Faculty of Mechanical Engineering. The event was targeted to potential investors in power plants for green electricity production.

Aim & programme

The event was organised to Upper Austria in order to present potential investors in Slovenia with best practice examples from foreign country. In the framework of study tour participants have seen different technologies for green electricity production. The program of site visits was prepared by O.Ö. Energiesparverband from Linz.

The following site visits have been seen:

- Welcome in the office of ESV with short seminar
- Biomass CHP plant Linz
- Biomass district heating plant, small hydro power plant and biogas plant Antiesenhofen
- Geothermal CHP plant Altheim
- Biogasplant Linsbod, Pucking
- Building-integrated PV plant, Leonding

Results, follow-up:

21 participants attended the study tour which was very interesting and educational. Especially geothermal CHP plant in Altheim was interesting because in Slovenia there is no such power plant so far.
